HIGH PRESSURE WATER BLASTERS & ACCESSORIES

CD550 Series:

These large water-jetting machines are suitable for several different applications, from automated water-jetting jobs to robot controlled hydro-demolition.

Equipped with modern low emission common-rail diesel engines, inside a sound proofed container, lowers the noise and makes it possible to use these units almost everywhere.

The units are designed with air in-take and air out-let on the roof, meaning that the container can be positioned close up against other structures, and still being able to operate.

The inside stainless steel sound deadening coverage ensures a long lasting, easily maintained and durable enclosure for the inside parts.

Optionally the units can be build to comply with Zone II or Norsok Z-015 flameproofing requirements.

And the 14' containers can be delivered as DNV 2.7-1 offshore approved units.

Company Profile :

Den-Jet's long experience in the high pressure industry has enabled us to create a range of water blasters and accessories, suitable for numerous applications in the industrial and marine industries. DEN-JET supplies complete packages to end-users and distributors, as well as bare shaft pumps and parts to OEM's. Our main goal is to produce quality products at a competitive price level.
